# Make navigation easier

## Voyager PLANNING STATION

An easy to use navigation management system for ordering charts and publications.

**Simplifying route planning and making it easier for crews** Plan routes quickly and efficiently and get fast access to navigational products. Simplify and automate routine navigation tasks to save crews time and reduce navigation related observations and deficiencies.

**Share information between ship and shore** Sharing real time information between ship and shore gives you greater transparency and more control. View up to date navigation compliance information and take proactive action, check and approve purchases, display planned routes and monitor vessel progress.

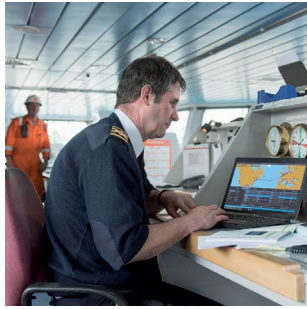

**Reduce navigation compliance risks** Reduce Port State Control and SIRE non-compliance with a detailed view of the navigational activities and navigation compliance records of every vessel in your fleet.

**Transfer ENC's to ECDIS more safely and easily** ENC's, AIO, ENC updates and permits from the back of bridge computer to the ECDIS while, at the same time, helping to protect against the transfer of malware.

**Weather routing and optimisation** Voyager PLANNING STATION works with the world's leading weather routing software to optimise routes. Choose from either of our partners, Meteo Group or StormGeo.

**Enhance your shipping operations with data-led navigation**

## Voyager PLANNING STATION Technical Specification

### Services

ENC Updates	AVCS, Admiralty Information Overlay, Primar ENC Service
Other Digital Updates	ADP, eNPs, ARCS
Paper Product Updates	BA Chart and Publications Notices to Mariners, BA Chart Tracings, Annual Summary, Cumulative Notices to Mariners, Loose-leaf publications
NtMs for National Charts	US, Canada, Korea, Japan, Australia, New Zealand
Other Services	Navarea Warnings, Voyager INSTANT PERMIT, V- DRIVE USB, Voyager OPEN PERMIT Pay as you Sail, GPS feed
