Enhance vessel monitoring and security

Voyager ROUTE EXCHANGE

Shares routes between ship and shore

Voyager ROUTE EXCHANGE enables you to securely store and retrieve route files in Voyager CLOUD and share them with shore based teams to enhancing vessel monitoring and security.

Save and share any route created in the international standard .rtz route file format including all routes created in Voyager PLANNING STATION as well as in any ECDIS.

Creation Date	Departure Port	Departure Date	Arrival Port	Arrival Date	Filename	Status
2016/05/15 08:40:51 AM	Aberdeen, U.K.	2016/05/13	Peterhead, U.K.	2016/05/14	999999_Aberdeen_UK_20160513	Uploaded
2016/05/15 09:32:21 AM	Dover, U.K.	2016/03/08	Boulogne-sur-Mer, France	2016/03/09	999999_Dover_UK_20160308_Bs	Submitted

2016/05/15 09:32:21 AM	Ramsgate, U.K.	2016/03/02	Nassau, Bahamas	2016/03/15	999999_Ramsgate_UK_20160302	Not Submitted

Using Voyager ROUTE EXCHANGE, authorised shore based personnel can access and view planned routes and monitor vessel progress to help improve shore based situational awareness and enhance vessel security.

Shore based teams access and view shared routes using Voyager FLEET INSIGHT online customer portal.

Voyager ROUTE EXCHANGE is free to VFI Navigation Management Service customers.

Enhance your shipping operations with data-led navigation
